

DEAN H MACKAY ISSUES REPORT FOR LAST YEAR

New Electrical Dept Opened For
Research Last Year

DR. HERDT MISSED

Marked Decrease in Registra-
tion in First
Year

The report of the Faculty of Applied Science came to hand yesterday. The following is a resume of Dean Mackay's statement. Registration of students in the faculty of session of 1926-6 was considerably lower than that of the previous year. This is probably due to the prevailing conditions in the world of commerce at the present time. Unfortunately there is usually a lag of four or five years between demand and supply, on the other hand the increasing demand for young men with a sound engineering training in other than purely technical occupations has a stabilizing effect.

The decrease in registration is also partially due to a firmer insistence in matriculation requirements. Although a marked improvement is shown in the number of students demoted there are still far too many who failed to complete their year without undue effort. This may be partly due to the very full timetable which has been prescribed for the students in past years. At present the curriculum is sufficiently difficult to afford reasonable scope for the powers of stronger men, and the fact that a considerable number are able to complete each year's work in a thoroughly satisfactory way without undue effort indicates that it is fairly well adjusted to this purpose. Nevertheless it is probably true that there is a considerable body of earnest students who would receive more benefit from a less extensive curriculum and more thoroughly assimilated. The question of improving methods

CERCLE FRANCAIS WILL MEET SOON

Joint Meetings With R.V.C.
Will Feature Programme

The McGill Cercle Francais will resume its meetings in about two weeks according to the president, Jacques Herdt, who has called an executive meeting for tomorrow afternoon. Already, however, plans are being made for a record year, and the officers are confidently hoping that more students than ever before will avail themselves of this excellent opportunity to learn French.

The bi-weekly meetings, held in the Union, are carried on entirely in French, and are featured by debates, discussions, sing-songs, occasional plays, and at each meeting some well-known speaker addresses the students. The discussions following the debates are probably the most valuable and certainly the most entertaining element in the meeting.

This year, as usual, two joint meetings will be held with the Societe Francaise, of the R.V.C. These meetings always draw a large attendance and the program is followed by a dance. Both Societies contribute to the programme, which thus becomes of very lively interest. The first of these meetings will be held in the Union some time around the end of November, when the Cercle Francais will be hosts of the Societe.

The date of the first meeting of the year will be announced following the executive meeting tomorrow when other details with regard to the plans for the year will doubtless be forthcoming.

SCIENCE '14 HELD DINNER

Harry Grimsdale Received
Honorary Degree

Science '14 has met once more for their annual dinner. This class, which is the largest that has ever graduated from McGill, has not missed this pleasant reunion since the last year of the war.

At their dinner at the faculty club they shook the hands of their old college associates with all the enthusiasm of former years.

Upon "Harry" Grimsdale, for many

JOINS BENEDICTS

Leslie Stephenson, popular member of Commerce '27 who was married yesterday afternoon.

PROMINENT MCGILL STUDENT MARRIES

Leslie Stephenson of Com. '27
Weds Beatrice Millington

A wedding of interest to McGill students was solemnized yesterday afternoon by Rev. W. J. Johnson at Centenary United Church, Point St. Charles, when Beatrice Millington, only daughter of Mrs. T. G. Millington, 5389 Park Ave., was united in marriage to Leslie Stephenson Com. '27, 15 Princess Parade, Finchley London England.

The groom is one of the most popular members of the Senior class in Commerce being president of his class and past president of the Commercial Society, the undergraduate society of the Department of Commerce. He was also captain of the Intercollegiate Champion Soccer team '25-26. He was elected a member of the Student's Council last year and is active in the Canadian Club. During the war Leslie served overseas with the Royal Highlanders of Montreal and the Hawke B. E. F. Since his entrance to McGill Battalion, 63rd, Royal Naval Division in 1923 he has been a Captain in the C. O. T. C.

Immediately after the ceremony the happy couple left for a week's honeymoon at St. Jovite and on their return next Saturday will take up their residence at 5389 Park Ave.

RECEPTION FOR FRESHMEN

Annual Supper in Strathcona
Hall on Thursday

A hearty welcome and varied programme will await the freshmen who attend the reception to be given in Strathcona Hall on Thursday evening. Plans are now almost complete, and everything depends on a good turnout of first year men, who have never failed to respond eagerly to this annual invitation.

The programme will include yells and songs, speeches from prominent men of the University, and also R. O. Hall who has recently returned from China.

All freshmen who wish to attend are asked to hand in their names at the office in Strathcona Hall today or tomorrow.

MEDICAL RUGBY

The game between Medicine and Arts will be played on the Old Campus this afternoon at 3.30 sharp. The Medical team will dress at the Union and are urged to be there at three o'clock. A limited number of uniforms will be provided.

Years janitor of the Engineering Building and well-known by Science students for his interest in the faculty, was conferred an honorary degree. Apart from the speech which accompanied this ceremony, there were none made, other than very informal ones.

Thirty members of the year from all parts of Canada and the United States were present.

FALL FROLICS WILL BE FIRST DANCE OF YEAR

The best college band available, Freddie Gross' dance aggregation, is to play.

A novel scheme of decoration, that features something new in lighting effects.

A midnight supper of the very best is assured by Pierre.

Souvenirs and favors of all kinds are to be supplied in abundance.

The best five dollar entertainment that can be had.

FALL FROLIC OPEN SOCIAL YEAR FRIDAY

Innovation in College Dances Now
In Preparation

FRED GROSS' BAND

Novel Electrical Effects,
Pierre Catering and Favors
Galore Promised

"This is our lucky year," one exuberant yokel hoarsely whispered to another as they wended their zig-zag way homeward along Sherbrooke Street in the 'wee sma' hours' last Sunday morning. And then the oldest living undergraduate spoke as follows, "I have a feeling in my bones—no, not rheumatism ye loutish youth!—that Saturday's victory was but on a temporary basis, you prizez hound—of this season's events, not only on the gridiron, Gus, but in all spheres of college life, social as well as—"

"That reminds me," the hatless youth broke in, "hast thou a pleated shirt in which I may array myself next Friday evening? What for, thou ask, and you the oldest living undergraduate! Then cluster round."

"For the first time in the history of McGill this social season will be inaugurated by an innovation in the line of formal dances, 'the First Fall Frolic'. Having just returned from an European tour, during which they played before all the crowned heads, baid heads, and dead heads of that continent, Freddie Gross' unsurpassed dance band has been secured to handle the musical end of the evening. This aggregation needs no introduction to those who attended last year's Alma Mater, nor to those who applauded for encores by them at the recent Pep Rally.

A novel decoration scheme, which involves a radical change in electrical effects, has been entrusted to the competent hands of architectural students who were so successful in the modelling of last year's Red and White Revue scenic settings.

Pierre's reputation as a caterer par excellence at college functions ensures

(Continued on page four)

ANNUAL BOARD'S FIRST CONFERENCE

Will Meet Again on Thurs-
day in Union at Five

The new Annual Board held its first meeting for the year yesterday afternoon in the Annual Board Room in the McGill Union. Last year's Editor-in-Chief, Allan Ross, presided. He explained that this meeting was being held as a get-together preliminary to the election of officers from among the representatives from the various faculties.

Nominations for the positions of Editor-in-Chief and Managing Editor will be submitted at the next meeting which will take place Thursday at five o'clock in the Union.

Besides Allan Ross and Ross Harkness the following were present: Miss B. H. Tweedie of the R. V. C.; C. H. Peters, Arts; G. P. Southerland, Medicine; Paul Casey, Law; J. G. Nelles, Commerce; R. C. Betts, Architecture; H. B. MacCarthy, Applied Science; L. T. Tooker, Dentistry; and V. C. Dawson of Macdonald College.

PIERRE HAD GOOD DAY

Cafeteria Crowded After Mc-
Gill's Triumph

The cafeteria was well attended both before and after the game, the manager being well pleased with Saturday's results, a record crowd for the year.

The manager hopes to make several changes for the better in the near future. He found that the individual milk has been selling so well that he is tempted to try buttermilk in the same way.

He is also interested in vegetable dinners and would like to introduce this idea. His idea being that he supply several vegetables and a pouched egg at a reasonable price.

There have been several changes in the dessert line. On right side of the dessert counter, will be found 3 or 4 desserts for the 35 cent lunch. You have your choice. On the other side you will find a choice of 6 or 7 desserts for the 45 cent lunch.

The manager hopes that this years

First Meeting Of Daily Staff Held In Union

Talks on news writing, sports stories, the general duties of reporters on the Daily as well as on the functions of the advertising department were given at the first meeting of the Daily staff which was held in the Union Cafeteria last night.

Over 50 members, including several reporters from the R.V.C. and M.S.-P.E. attended the meeting and discussed at great length some of the high lights of modern journalism. The meeting proper which was concluded by the serving of refreshments, there was added as an extra attraction, a visit to the Herald Press, where the Daily is printed. Here the various processes in connection with newspaper publishing were thoroughly explained by Harold Arthur, foreman of the composing room.

The linotype operators also delighted the members of the R.V.C. staff by presenting them each with a slug of type, bearing their names. Several of the staff also received souvenir pictures of Frank Shaughnessy.

PHYSICISTS TO START LECTURES

Dr. Barnes to Speak on Ice
Engineering

TALK ON X-RAYS

First Lecture Thursday Next
Oct. 14. — Regular
Meetings Thereafter

Announcement was made yesterday by the Physical Department that the regular course of Graduate lectures are to begin next Thursday, Oct. 14th at 5 p.m. and thereafter every Thursday afternoon from 5 p.m. to 6 p.m.

The first four lectures should be of special interest to the student body and others; for they are to be given by Dr. Barnes and his subject will be Ice Engineering.

The name of Dr. Barnes was on every one's lips last spring when he did such splendid work with Thermite, and helped to break up the ice jam which was doing a great deal of harm in the United States where he was experimenting at the time.

The full list of lectures as issued by the Department is given below.

Oct. 14, 21, 28, and Nov. 4: Ice Engineering—A short course of four lectures on the technical development and the physical problems of Ice Engineering. The topics treated this year will include:—Ice Remedial Work; the Use of Thermit, Calcium Chloride, etc.; Glacier Ice and Icebergs; Conservation of Heat in Lakes and Rivers; Ice Prevention.

By Dr. H. T. Barnes, F.R.S. Nov. 11.—The Impact of Light on Electrons. By Mr. B. Priestman.

Nov. 18.—Further Problems on the Stark Effect. By Mr. W. Rowles.

Nov. 25.—Production and Properties of Ultra-Short Radio Waves. By Mr. H. G. I. Watson.

Dec. 2.—Recent Work in X-Rays and Crystal Structure. By Mr. T. N. White.

Dec. 9.—Problems in Colour Perception. By Mr. A. J. Fleming.

Jan. 6.—Review of Recent Developments in the Study of the Stark Effect. By Dr. J. S. Foster.

Jan. 13.—Magnetic Properties of the Alkali Metals. By Mr. C. T. Lane.

Jan. 20.—A problem in Spectroscopy. By Miss M. Crowe.

Jan. 27.—(Reserved).

Feb. 3.—Relative Intensities of Stark Effect Components. By Miss L. Chalk.

Feb. 10.—Infra-red Spectroscopy. By Mr. F. Terroux.

Feb. 17.—Review of Problems in Hygroscopy. By Mr. E. T. Davies.

Feb. 24.—Recent Work on Positive Rays. By Dr. D. A. Keys.

March 3, 10, 17, The Gyro-Magnetic Electron. (1) Theory of Spectra. (2) The Zeeman Effect. (3) The Stark Effect. By Dr. L. V. King, F.R.S.

Scarlet Key Hold Meeting At 8.00 Tonight

There will be a meeting of the Scarlet Key Society at 8 p.m. tonight in the Union.

It is most important that members should make every effort to be present as there are several very urgent matters to be discussed.

service will please his customers and that there will be as big an attendance as usual, or larger.

MAJOR STEELE JOINS MCGILL SIGNAL STAFF

Appointed To New Department Of
Communication Engineering

RADIO EXPERT

Will Give Series of Twenty-
four Lectures on This
Subject

The new department of Communication Engineering is to have on its staff Major W. A. Steele, M.C., M.Sc., Assistant Director of Signals and Technical Expert of the department of Signals, of the Dominion Department of National Defence, is the announcement made yesterday by the University authorities.

Major Steele, who has been loaned to the department of Communication Engineering by the government for a period of two years will take charge immediately of the wireless branch of this department, and will act as a member of the staff for a period of two years. During this term, the Major will deliver 24 lectures a session, the subject to be "Radio." Major Steele is considered one of the foremost Canadian authorities on this important subject. The course will deal mainly with the fundamental principles of radio. Included in the course are to be thirteen periods of laboratory work which are to be carried on in conjunction with the course, and in which Mr. Howes will assist Major Steele.

The announcement in regard to the appointment of Major Steele goes on to say in part: "It is the policy of the signals branch, concurred in by the advisors of the Minister of National Defence and of the minister himself that signal officers shall be recruited from the universities, and so important is this source of officer recruits that the Department has thought it worth its while to give this very material aid to the building up of the new department at McGill. The department of National Defence has from its inception taken a great interest in the new Department of Communication Engineering."

(Continued on page four)

PLAYERS CLUB TO COMMENCE SEASON

Three Plays are to be Pro-
duced Before Christmas

The 926-27 season of the Player's Club will commence with a general meeting of the Union at 8 p.m. tomorrow Oct. 13th, to which are invited old members and all those who are interested in dramatic activity, whether they possess already proven talent or merely wish to associate themselves with the club and to promote its interests.

Hitherto the McGill Players Club has had a more or less chequered career. Twice it was launched and foundered on the rocks of unsuitable productions or sank in the quicksands of student apathy. But two years ago in response to a growing demand among the student body the club was reorganized and last year got its full swing.

The production of Pinner's Sweet Lavender, finished off a full year and despite the difficulties of staging in an improvised theatre, most kindly and generously supplied by Professor Lloyd in the Biological Building, the play was a success and well received and appreciated by those who saw it.

Talent was discovered and some raw material polished up by the efforts of Jack Taylor and with nearly all the original caste back in College, the prospects for possible more ambitious productions this year appear bright.

Amateur productions however demand a certain amount of hard work and a certain amount of drudgery from those who would interpret an author's fancies on the stage. It is hoped to organize readings and discussions in connection with the club and to have talks on stagecraft from some members of the theatrical profession during the season.

Work will commence almost immediately on the three one act plays which will be produced before Christmas and these will require a fairly large number of actors and actresses and will give opportunities of selection and training to more than could be accommodated in one larger play and at the same time give scope to a diversity of talent.

With the larger opportunities afforded by possessing a theatre in the (Continued on page four)

Bright Freshie Outwitted Soph Re Baby-Soother

Those who were hanging around the door of the Engineering Building at about 9 o'clock yesterday morning saw a pugnacious sophomore cleverly outwitted by a bright freshe.

The freshe in question was sighted from afar as he tore up the road, loaded down with song-book and cap, but minus his baby-soother. The indignant and frowning sophomore down on him as he reached the steps and demanded the why and wherefore of the discrepancy, whereupon the wily fellow merely smiled and exuded the required half of the soother from his mouth, where it had been in hiding all the way up the campus.

Before the disappointed upper-classman could assemble a fitting comeback, his youthful tormentor had effaced himself from the scene, and was well out of harm's way.

DR. HINCKS SPOKE TO MEDICAL MEN

Mental Hygiene is Subject of
Address

MANY EXAMPLES

Study of Personalities in the
Practice of Medicine
Required

Dr. C. M. Hincks, of Toronto, was the principal speaker at a meeting of the Medical Undergraduate Society held in the New Medical Building last night. Dr. Hincks took as the subject for his address "Mental Hygiene as Applied to the Practice of Medicine."

The speaker emphasized the importance of studying personalities in the active practice of the medical profession, as this is of primary importance in winning the patient's confidence. Physicians of the present day are too apt to ignore the individual characteristics of people in their study of various ailments. Thus the family practitioner is often weak in actual scientific knowledge, but strong in practical psychology.

An interesting case cited by Dr. Hincks was one of a young doctor who had tuberculosis just as he had made a fair start in his career. He immediately went to an important sanatorium and after being given a thorough examination was put under treatment. Being a doctor he knew his exact condition and was very pessimistic about his chances of recovery. A friend of his in his profession on hearing of his case anticipated his decline from his own experience and wrote him a letter which dispelled his pessimism and arrested the disease.

The speaker believed that in many cases mental disorder is the only ailment. He cited several examples of cases when men have been cured mentally when physicians have been at a total loss to diagnose the disease. Emotions such as fear have a drastic effect upon the action of heart and lungs. Another important factor in curing mental disease is suggestion. When visiting physicians one's suggestibility is at its greatest so that his attitude and manner influence the patient. Dr. Hincks gave many examples throughout his address, which was much appreciated by members of the Society.

AMERICAN CLUB

Today is the day when all Americans are expected to meet in Union in order to arrange a schedule for the 1926-27 session. The Union music room will be the scene of this meeting, which will take place at 5 p.m.

WHAT'S ON

TODAY.

1.00—R.V.C. 30 Meeting.
1.00—Women Graduates at R.V.C.
1.30—R.V.C. Sports Practice.
2.30—Swimming.
3.00—Track Practice.
3.45—Arts-Med. Football.
5.00—American Club.
6.15—Old Scouts Club.
8.00—Scarlet Key Society.

COMING.

Oct. 13th.
Chess Club.

PRIZE WINNERS IN FALL EXAMS ARE ANNOUNCED

Four Charles Alexander Prizes For
Second Year Students

SCIENCE PRIZES

Hon. Robert Jones, Prize and
Robert Bruce Bursary to
Beginners

Dean Ira Mackay, announced this morning that 16 Scholarships had been awarded to students in the Faculty of Arts.

The Four Charles Alexander Scholarships which are given each year to students in the Second Year who obtained the Highest Standing in the September Scholarship Examinations were awarded to: Kenneth Brown, Montreal; Samuel Gold, 1632 Clark Street, Montreal; Jane Howard, 372 Mountain street, Montreal, and Regina Shoelman, 2309 Esplanade avenue, Montreal.

Kenneth Brown is the son of Dr. E. Brown, Professor of Civil Engineering in the Faculty of Applied Science at McGill, and Jane Howard is the daughter of Judge Howard. University Scholarships, awarded in second year, for creditable standing in the competitive scholarship examinations held in September, have been awarded as follows: Harry Kilger, 835 St. Dominique street, Montreal; Paulette Benning, 5619 Park avenue, Montreal, and C. M. McLeod, Richmond, Que.

University scholarships, in third year, are awarded as follows: Alice Ruark, in Latin and Greek, tenable for two years. She is a Montreal girl, residing at 1105 Bernard avenue Outremont.

Sir William Macdonald Scholarships tenable for two years, are awarded as follows: In Latin and French, to M. Mendels, 536 Notre Dame street, Montreal; In Mathematics and Physics, to R. W. Dobridge, St. Kitts, West Indies; and to G. V. Helwig, Jamaica, West Indies; also for Mathe

(Continued on page four)

OLD SCOUTS MEET AT S.C.A. TO-NIGHT

All New Men Asked to At-
tend Supper at 6.15

The Old Scouts' Club will begin its session tonight when the group will gather round a supper that will remind them of camp. Those who have gathered formerly at these meetings know that they have taken and given hints and knowledge which has materially helped them. Tonight the object will be to greet the new comers and to outline and discuss the sessions plans.

Quite naturally the members are to be found in either of two groups: those who have partaken of the movement and now owing to scholastic duties are unable to continue in that direction, and those who brave the chance of the professors' wrath and are now actively interested in troops in the city. These two elements coming together in a common interest can mutually assist each other. It would be helpful if each individual member would bring along one suggestion then there will be ample scope for the session's activities.

The meetings are held monthly and so it does not entail very much time off. No doubt many have enjoyed camp suppers during the summer and these hours will enable them to keep a live that spirit which is always manifest in such groups. Now that Scouting is so universal it is felt that at least twenty per cent. of the students at McGill have been in some way connected with the movement at one time or another. It is said "Once a Scout, always a Scout" and there should be no hesitation in keeping aglow that desire which is deep down in the hearts. To go through college without any connection with that which has been uppermost in former years will be both detrimental to the youthfulness which is essential in life, and to the movement which is likely to be the binding tie of the whole world. It is best to plan out which evenings are to be spent in other activities early on in the term and to devote one evening a month to the Old Scouts' Club will be a profitable arrangement.

Supper will be served at 6.15 p.m. and the executive tenders a hearty welcome to all brother Scouts.

Leo Edell	News Editor.
J. G. Brierley, '29.	R. W. Jones, '29.
G. Brown, Jr., '28.	D. M. deC. Legate, '27.
Virginia Campbell, '28.	J. G. Nelles, '28.
Isabell Craig, '28.	C. H. Peters, '28.
C. L. Copland, '29.	L. Schwartz, '27.
C. H. Dawes, '27.	Beatrice Tweedies, '27.

At McGill there are a large number of activities controlled and run by undergraduates. All these need new men each year in order to carry on. The large number of activities gives a wide range of choice for new men—all of whom are expected to decide on and take part in some organisation

Upper class: Those whose costume makes custom. Middle class: Where custom makes costume.

It is estimated that southern British Columbia will produce 3,217,000 boxes of apples this season, this is about 1,000,000 boxes more than last year's production. Arrangements are being made for a heavy export business to Great Britain, as well as to the Prairies and Eastern Canada.

McGILL UNION

TRAINING TABLE FOR BACK SQUAD BEGUN

Team Prepares for Interfaculty Meet on Friday

LACK OF JUMPERS

Late Date of Intercollegiate Meet Affords Time for Newcomers

A full turnout greeted Coach Van Wagner yesterday afternoon on the resumption of track activities for the first time since the Freshman-Sophomore track meet. The event that looms up now is the Interfaculty meet next Friday, in which all the Red and White performers will compete. Entries for the meet close at six o'clock tonight in order that all the names may be printed in the program. Post entries, however, will be accepted up to the opening hour of the meet.

An inkling of those who will comprise the Red and White Intercollegiate track team may be obtained from the list of those requested to attend the track training table which began last evening. The following were present at the training table, Adams, Airey, Amaron, Balmer, Blemer, Brodie, Brown, Caron, Cole, Consiglio, Cummings, Currie, Darling, Duckworth, Fraser, Hanlon, Harris, Irvine, Jardine, McMaster, Morton, Parish, D. A. Ross, Rahmanop, Rubin, Smith, Solomon, Spence and Urquhart.

The coach again issued a call for all those interested in track affairs to turn out and train. There is still time to train before the intercollegiate meet, it being held two weeks later than usual this year. There is a decided lack of jumpers this year and all those with some talent in this branch of the sport stand a good chance of making the squad.

YOUNGEST MEMBER OF LEGION IS FRESHMAN

Registers at University of Oregon — Had Wide Career

Eugene, Oregon, Oct. 11.—(By Exchange Service)—The youngest member of the American Legion by six years is enrolled in the University of Oregon as a freshman this year. He is Maurice Packer of whom many interesting experiences have been told.

A runaway at the age of ten, a mascot in the A.E.F., the youngest enlisted man in the American forces and later an outstanding student in the United States; these are but a few of the high lights in his life. In his own words the story of his life runs something like this:

"At the age of 10 I ran away from home because I was acting as the cook and 'maid' for our family. My mother was dead, my oldest sister was staying away from home, my elder brother was also staying some place else, and my father worked from six in the morning till six in the evening. Consequently, I had to do the housework as well as the cooking. I soon tired of this and decided to fake the French leave. Twice I ran away from home and twice I came back home for food and shelter. The third time I was picked up by Moe Sax, Frank Bosh and several other boys from Company D of the 162 Infantry. I was sleeping very soundly on the sidewalks of Penhouet, St. Nazaire at the time and I was very cold. I was taken to the camp of these men and there I was treated like one of the men. I stayed there three months and at this time Company D was ordered to the front. I was told that I could not go along and this just about broke my heart. When the train pulled out of the station I jumped on one of the cars without being noticed but my happiness was short lived for midway between Penhouet and Nantes I was detected by the cabman. He reported me to the French authorities and after a struggle between the soldiers and the French gendarmes I was taken off and sent back home. I went back to the camp and stayed there with the 6th Cavalry. They in time went to another camp but before they left they purchased a bicycle for me. Soon after they left I started for Nantes on my bicycle. I located the camp and stayed there for a little while. I met two men from the 31st Engineers and I told them that I knew several men at their camp. They took me along with them to Saumur and there I met Mr. Packard. He very kindly decided to adopt me and although my father was very doubtful as to whether he should give me away he finally consented. Soon after this we were ready to come to America.

"Before we left St. Nazaire I was regularly enlisted in the Army. This was to avoid much red tape. While on the ship the sailors adopted me and fitted me with a uniform. We arrived in New York on March 24, 1919 and two weeks later started on our journey which was to take us across the United States and finally end up at Camp Lewis, Washington. From there we were discharged. I was twelve years old then but as I spoke, poor

DOWN TO BRASS TACKS

With D. A. L. MacDonald.

SEA SCOUTS AT THE GAME.

Coach Bill Hughes of Queen's attended the Varsity-McGill game on Saturday. We do not know if William got an invitation down here, but if he didn't, he violated one of the unwritten laws of intercollegiate football. Coaches are not allowed to scout at scheduled intercollegiate games between the other two colleges.

ERECT MEMORIAL FOR WALTER CAMP

Gateway at Yale for "Father of American Football"

Athens, Ga. Oct. 11.—(By Exchange Service)—A national memorial will be erected to the memory of Walter Camp by the universities, colleges, and schools of the United States. It will stand in the midst of the Yale athletic fields and will take the form of a monumental gateway. Upon the panels on either side of the gateway or colonnade will appear the names of all the universities and colleges that have contributed to the memorial.

The cost of the memorial has been estimated at \$350,000. Of this amount the Committee of the National Collegiate Athletic Association on behalf of the universities, colleges, and schools, other than Yale, has undertaken to raise one half. Yale men will raise the other half.

It was on the Yale athletic fields that Walter Camp laid the foundation of his national fame. To all who see it, the monument will be a reminder of the enduring services of Walter Camp to the world of sport. What he did is too well known to everyone familiar with athletics in the United States to require any emphasis here. He well earned his title of "Father of American Football." Throughout a long and active career he threw his tremendous influence on the side of clean sport, hard physical training, and sturdy manhood. Every institution and every individual taking part in intercollegiate athletics owes something to his lifelong efforts. He helped make American football what it is today. He exemplified the sportsman's code in letter and in spirit.

This is why in every part of the United States the season of 1926 will see football schedules of both universities and colleges featuring a "Walter Camp Game" when all lovers of the great game may pay silent tribute to the "Father of Football," one of America's thoroughbred sportsmen—Walter Camp.

Harvard, as the natural rival of Yale in the field of sport, has announced the Dartmouth game as the Walter Camp Memorial Game. All the Southern Conference teams will soon announce a memorial game. Vanderbilt has announced the Georgia game in Nashville; Tech the Georgia game in Atlanta; Kentucky the Central game in Lexington; Georgia the Florida game in Athens, etc.

The Georgia-Florida game — the homecoming game — the reunion of the "G" men — has been designated here as the Walter Camp Memorial Game.

STUDENTS GO FROM WILDS TO COLLEGE

Brother and Sister Enter University of Manitoba

Winnipeg, Man., Oct. 11.—(By Exchange Service)—From our great Canadian Hinterland, the paradise of the novelist, but the land of stern reality to those who know it, come two students to the University of Manitoba this year.

Registered at Wesley College, Esther and Nelson Gaudin came in search of higher learning from north of Norway House, twenty miles up the Nelson River from the farther end of Lake Winnipeg.

Mr. Gaudin is taking first year work at the college, and his sister, senior matriculation. They left home recently on one of the last boats to ply southward this season, and will have but irregular contact with Norway House throughout the winter.

The out-of-town student will appreciate the position of these two who come from the northland when he considers it from the standpoint of that letter home for financial assistance. Mr. Gaudin must live on milk shakes and chocolate bars for six weeks, if the emergency should by any chance arise, while a dog team carries his plea for help four hundred miles northward to the parental roof-tree.

No one appreciates the perils of motoring like the pedestrian.

English I was placed in the third grade."

Since that time Mr. Packer has finished his elementary school education in both grammar school and high school. In his senior year in high school he was a leader in social as well as class activities, being senior president of the boys' athletic association, and many other offices.

TO CONSTRUCT SPEED SKATING RINK HERE

Will Greatly Enhance McGill's Chances in Sports

That McGill is to have a quarter mile speed skating track on the campus this winter in the salient feature of an interview given to a Daily reporter to-day by Wm. Thompson, President of the Winter Outing Club.

McGill's chances of victory in former Winter Carnivals have been seriously prejudiced by lack of experienced speed skaters, but it is anticipated that the existence of a championship skating track upon the campus will remedy this deficiency.

The building of such a rink at McGill has largely been made possible by the interest and energy displayed in this direction by Col. Bovey who is a former speed skating champion.

The Intercollegiate Winter Sports Meet is to be held at McGill this coming February and the speed skating events, the quarter-mile and the two mile, will be contested on this new rink.

In addition to its speed skating interests, the Winter Outing Club embraces skiing, snowshoeing and fancy skating. The Intercollegiate team is comprised of twelve members, two men in each of the following events: speed skating, fancy skating, ski jumping, ski proficiency, ski racing, snowshoeing.

Through graduation there will be a number of positions on the team to be filled, and if candidates of sufficient ability appear a team will be sent to Lake Placid and to Quebec during the Christmas vacation.

VARSITY OPTIMISTIC FOR TRACK VICTORY

Shanacy, Adams and Finlayson Raises Toronto Hopes

Toronto, Oct. 11.—(By Exchange Service)—Varsity's chances of retaining the Intercollegiate Track Championship are brighter than ever in view of the addition to the team of three outstanding stars in Shanacy, Adams and Finlayson.

At first it was thought that Varsity was going to be hopelessly weak in the field events, but she now has them all filled by the acquiring of Shanacy of U.C.

Shanacy can do six feet in the high jump, one hundred and fifty-seven ft. in the javelin throw, and twenty-two feet three inches in the broad jump. Six feet in the high jump will set a new Intercollegiate record by four inches. One hundred and fifty-seven ft. in the javelin throw is thirteen feet farther than Les Black threw it to win the Intercollegiate title last year. The Intercollegiate record in this is one hundred and forty-eight feet. Twenty-two feet three inches in the broad jump will equal the record set by C. Bricker twenty years ago. Last Friday in the Interscholastic meet Shanacy did twenty-two feet, nine inches on a foul jump. In addition to this Shanacy is capable of placing in the shot put and discus.

Adams and Finlayson are two sprinters who with Harley Russell and Cam Maboe ought to give Varsity a clean sweep in the hundred and twenty.

University College, with Shanacy, Maboe, Adams, Finlayson and Christie have the edge on winning the Interfaculty Track title, but "School," with Russell, McKenzie, Morrison and Burke, and "Meds" with Mitchell, Crawford and Burns will give them a hard run.

The zeal with which these track men are turning out to train at the track makes it look as though a whole new set of records will go up.

Chapel Hill, N. C., Oct. 11.—(By Exchange Service)—The installation of a seismograph at the University of North Carolina for the registering of earth tremors will be arranged soon when Dr. Collier Cobb of the Geology department completes his plans for the financing of the instrument. This improvement with the remodeling of New East will make the Geology department conform to the ideals which Dr. Cobb has held for a long time.

The new instrument will enable the University to receive first hand evidence of earthquakes and other disorders arising below the earth. Heretofore this information had to come from stations in the North and East.

Thank goodness, a man can die without waiting in line.

TENNIS ELIMINATION TOURNAMENT STARTS

To Decide Team for Intercollegiate Tourney

FIVE PLAYERS' COMPETE

Will Arrange Games Themselves — Wright and Leslie Chosen

The Elimination Tournament to decide the occupants of the other births on the McGill Inter-Collegiate Tennis Team will begin immediately. The matches must be played at once in order that the team may be formed to go to Toronto some time during next week.

So far Wright and Leslie have been chosen as two of the five representatives due to their showing in the McGill Tournament in which Wright was the winner, and Leslie the runner-up. Five men have been chosen to play off for the three or possibly four positions which yet remain to be filled. They are:

Stan Perry Up 5947.
Jack Frith Up 5947.
C. H. Peters Up 2722.
F. C. Holt Up 4805.
J. P. McInerney Pl 0938.

These men are to play each other and arrange their own matches, each one can be reached at the phone number indicated.

It is essential that these matches be played at the earliest possible moment because of the proximity of the Inter-Collegiate Tournament.

COACH SAYS FOOTBALL TEAM BUILT ON LOVE

Boys Play for Love of Pals, Game and School

New York, Oct. 11.—(By Exchange Service)—It was while describing the principal points of making a football team to a representative of the Associated Press, that Fielding H. Yost, University of Michigan's famous coach, paused and said:

"And the greatest of these is love. Yost used the word in the Biblical sense.

"Love of pals," he said, "love of the game, love of the school the boys play for. Hate is a negative force, while love is positive, and makes for strength, for the best fighting type of man, especially when it comes to fighting for the things in which he is interested. With it go courage, truth and faith, all positive forces."

"Do you mean that you can build a football team on this Biblical principle?"

"I mean," Yost replied "that you can not build a great football team, in the modern college game, without these heart qualifications. You must have other qualities too: physique, health and endurance. Millions of men have those qualities, but they do not make football players even with them. Along with this physique and heart qualities go intellect, and I mean an all round intellect, one which can think, remember and imagine."

Yost, was asked to tell what example of heart qualities had impressed him most.

"Some years ago," he answered, "when a great eleven played Michigan most Michigan supporters did not know it was really great, and when it won they attributed the victory to luck."

"One year later Michigan won against this team, and it was in the season of that victory that I saw an example of morale never exceeded in my observation. Early in the training long before the game I started asking the boys:

"What are you going to be doing on October twenty-second?"

GOLF ENTRIES CLOSE

Students vs. Staff Match Takes Place on Friday

Entries for the annual Students vs Staff golf match which takes place on Friday are coming in every day, but as yet the number is small. The date for the closing of entries has been extended until tomorrow night at 6 o'clock and at that hour all entries must be in at the Daily office or in the hands of Miss Oliver.

It is imperative that all those wishing to enter the tournament get their entry forms in before that time. Forms shall contain the players name, his handicap and the name of the club where such handicap is held.

103 YEARS OLD

Gambler, O., Oct. 11.—(By Exchange Service)—The doors were opened last week at Kenyon College upon the one hundred and thir year of this college. Admission was given 115 new students, making a total enrollment of close to two hundred and seventy-five.

Easy street straight ahead avoid a detour via court house.

It is feared that too many bachelors get all the credit for not marrying.

Wanted - Football Players

Twelve men are badly needed to complete the football squad as all three McGill teams play on Saturday, and the intermediates have a game tomorrow with Bishop's. On Saturday, the seniors play R.M.C.; the intermediates and juniors meet Loyola, and a dozen men of experience are urgently needed at the stadium to complete three teams.

ARTS RUGBY TEAM MEETS MEDICINE

Plays First Game in Interfaculty Series Today

Arts rugby squad, the fifth team in the interfaculty rugby series, will get into action for the first time today where they meet Medicine, the winners of last Friday's game with Science. The Medicine-Arts fracas is the only one on the books for this afternoon and is scheduled to start at 3.45.

The games scheduled for Friday, Oct. 15 have been postponed until the same day of the following week, Oct. 22 on account of the university sports held on that date.

The schedule, then, is as follows: Today 3.45 p.m.—Arts vs Medicine. Oct. 22 2.15 p.m.—Arts vs Dentistry. 3.45 p.m.—Commerce vs Science.

All Arts men who participated in yesterday's practice are asked to be promptly on hand for the Arts-Medicine game today by Manager Hink Russell.

Commerce Rugby

There will be a practice of the Commerce rugby team at 2.15 this afternoon. The following men are requested to turn out along with any others who may be interested — Consiglio, Dowling, Ayers, Almsworth, Pepo, Leburon, (2), Maughan, Smith, Budge, Swan, Stewart, Allan and Ireland.

COLLEGE OF MUSIC

Milwaukee, Wis., Oct. 11.—(By Exchange Service)—The expansion of Marquette University's college of music has been announced by the Rev. Albert Fox, president. The Meyer School of Music, a pioneer Milwaukee institution, will become part of the university and pupils and faculty of the school will be transferred to Marquette.

About all a rolling stone gathers is momentum.

R.V.C. CLASSES HELD MEETING

Seniors and Sophomores Elect Officers for Year

R.V.C. '27 and R.V.C. '29 elected class officers at meetings held yesterday. Miss Leona Gray occupied the chair at the meeting of '27 until Miss A. W. Turner was elected President for the coming year.

After Miss Turner had thanked her electors the rest of the officers were chosen, as follows:

Vice-President — Gwen Mabou.
Secretary Treasurer — Jean Gwynne.

Sports Manager — Marion Ferguson.

Hockey Manager — Helen Mulligan.

Basketball Manager — Pansy Perry.

Tennis Manager — M. DeBlais.

It was decided to elect the valedictorian and class historian at a later date. The question of the appropriation of the money left from last year's senior dinner was discussed and a committee appointed to suggest plans for its use.

R.V.C. '29 elected Miss Roberts as its new president. Miss Cox resigned the chair to her and the election of officers continued with the following result:

Vice-President — Sally Cox.

Sec. Treasurer — Eileen Peters.

Tennis Manager — Isabel Bennett.

Basketball Manager — Elsie Johnson.

Sports Manager — Agnes Morton.

Hockey Manager — Jean Snyder.

Poster Manager — Eunice Meekison.

Daily Reporter — Jane Howard.

The only other business at the meeting was the question of initiation.

SAYS STUDENTS OF RUSSIA ARE SERIOUS

Universities There are Well-Equipped Expert Declares

Bloomington, Ohio, Oct. 11.—(By Exchange Service).—"Students in Russian schools show intense earnestness and seriousness in their studies," said Prof. Marvyn Crobaugh, of the economics and sociology department of Indiana University, in discussing his recent trip to Russia where he made a study of the land problems.

"Russian students can not comprehend the American students' lack of interest in politics, and find difficulty also in understanding our fraternities and our great interest in competitive sports. They are interested in sports, but do not encourage the competitive side," Prof. Crobaugh continued.

The students have a central organization made up of representatives from all parts of the nation, according to Prof. Crobaugh. They have reduced fares on trains and co-operative restaurants. They also have a representative on the faculty who has a voice in arranging the curriculum. Although the buildings are old, the equipment of the universities is surprisingly good, he said. The laboratories are particularly so.

Moscow, Kharkov, the Tartar republic, the Caucasus, Ukraine, the grain producing region of Russia, the Don Basin and the mining region were a few of the places visited by Prof. Crobaugh and his party of eight people. They traveled under the guidance of students' organizations and were enthusiastically received by the students everywhere, he said.

Russians are interested mostly in American technique, efficiency, engineering and chemistry because these are the things they feel the country needs, Prof. Crobaugh said. Art and literature take second place. In Crimea all the old Romanoff mansions have been turned into rest houses for workers, who are given two weeks or a month's vacation there each year.

PLAYERS CLUB TO COMMENCE SEASON

(Continued from page one.)

University, it behoves the club to demand an extra effort on the part of those privileged to partake in one of the oldest forms of culture and entertainment.

At the same time we wish to emphasize that the aim of the club is not to educate the public to good plays, as I stated by so many similar institutions, but rather to form a training ground for those whose interests lie in a dramatic direction. On these lines we look for the support of many students at McGill and urge those interested to come forward and ally themselves with the oldest and hitherto the sole Dramatic Club of McGill University.

A regular aerial mail service has been established between Osaka in Japan and Darin in South Manchuria, two Japanese built "Kawanishi" planes being used. This service is daily, and is being sponsored by the "Osaka Mainichi" one of the largest newspapers in Japan whose aviators recently flew to Berlin.

DEAN H. MACKAY ISSUES LAST YEAR'S REPORT

(Continued from page one.)

of instruction is always before the faculty. Some progress has been made in reducing the number of lectures and in replacing or supplementing by what is really a form of tutorial or an individual instruction adapted to our conditions in the way of problem periods and individual reading under our guidance. These tutorials while making very heavy demands on the time of the staff have so far given very encouraging results.

Last year a course in engineering problems was introduced to first year students their object being to counter act the well nigh irresistible tendency to cram facts and formulae into the minds of students instead of training them to think independently. The success of this class whose influence will, it is believed to be felt more and more in succeeding years is due to the experience, insight and enthusiasm of a very capable group of instructors.

A new course in electrical communications has been worked out by the department of electrical engineering and will be offered next session. This course is designed to supply the rapid increasing demand for graduates specially trained in the principles underlying telephony and the field of wireless communications.

During the past year the Smithy and Foundry have been done away with and due to this twenty thousand square feet have been reclaimed for laboratory purposes. In the space vacated there has been established a fine hydraulic laboratory which affords long desired facilities for instruction and research in that branch which is of such primary importance in Canada. The mechanical department is also well under way with the equipment of a gas engine laboratory.

In April the faculty had to deplore the death of one of its most distinguished members, Dr. L. A. Herdt, Chevalier of the Legion of Honor.

Reports of the several departments are added as an appendix.

The number of students attending the department of architecture during the session 1925-26 was 27. Four students graduated a travelling scholarship for the Province of Quebec, Association of Architects, was awarded to Mr. H. A. Valentine, year three.

Arrangements for a collaboration in the study of Old Architecture of Canada and of this province in particular are being made between this department and the departments of parks and of Anthropology, Ottawa.

Civil Engineering and Applied Mechanics Messrs G. J. Dodd, M.Sc., and R. E. Jamieson, M.Sc., were promoted from the rank of lecturer to that of assistant professor. Mr. F. M. Wood, M.A. M.Sc. Queen's, was appointed lecturer in mathematics and civil engineering. Mr. A. Campbell, M.Sc., who for two years had done admirable work as lecturer in mathematics and civil engineering resigned at the end of the session to join the staff of the Dominion Bridge Company at Winnipeg.

The Gould Manufacturing Company Seneca, N.Y., donated to the Hydraulic laboratory two centrifugal pumps suitable for testing purposes. A steel roof truss of suitable size and specially designed for research purposes was donated by the Dominion Bridge Company, Montreal.

Metallurgical Engineering Mr. J. R. Morrison, B.Sc., succeeded Mr. G. W. Sweny, M.Sc., as research fellow. Department Mining Engineering Messrs A. E. Cave and A. J. P. Walter were appointed as teaching fellows for the session. Mr. Cave proceeded to the M.Sc., of the October convocation and Mr. Walter in May. Both have since resigned. Mr. Erlernborn also relieved Dr. Porter very greatly by taking over additional part of the lecture course on mining engineering.

PRIZE WINNERS IN FALL EXAMS ARE ANNOUNCED

(Continued from page one.)

maths and Physics; tenable for one year in Chemistry, C. McG. Gardner, 108 St. Matthew street, Montreal.

The James Darling McGill Scholarship, awarded in second year for distinction in English and Philosophy, valued at \$275, has been won by James C. Hudson, Adams Cove, Newfoundland. This scholarship was founded by J. T. McCall, in memory of his son, James D. McCall, B.Sc., who was drowned shortly after the close of the war, in which he served with distinction.

First year scholarships in Arts have been awarded as follows: Hon. Robert Jones Scholarship of the value of \$125 per annum throughout the students whole course of study of four years, and awarded on the results of the matriculation examination, is awarded to Francis J. Carbray, 60 Laurier avenue, Montreal; Robert Bruce Scholarship for high standing in Matriculation—awarded to Miss Esther A. Rowland, 692 Sherbrooke street west.

MANDOLIN CLUB OPENS SEASON

First Practice Held in Union Ball Room

The first practice of the McGill Mandolin Club was held in the Union Ballroom last night. A large number of musical enthusiasts turned out, among whom were several freshmen.

Gerald Pickleman, the president, in a few well chosen words welcomed the newcomers to the club. He stated that the music would be presented in a novel form this year.

Owing to unforeseen circumstances Forsk who was appointed director for the coming year will not be with the club this year. Pickleman will direct for the time being.

Everything points to a banner year and the executive hopes for the most hearty co-operation from all students interested in the club's activities.

A call is sent out for players of brass instruments of any kind.

FALL FROLIC OPEN SOCIAL YEAR FRIDAY

(Continued from page one.)

the success of a most important item of the evening's entertainment. Favours, balloons, streamers, and noise-making instruments, will be supplied in abundance, so there need be no fear that the party will lack vivacity or barbarity.

Tickets for this affair go on sale in the Union to-day at 12 o'clock. Former college dances have been more or less uncomfortably crowded, therefore the Committee have decided that by limiting the number of guests "a better time will be had by all."

"Indeed this is our lucky year, and lucky are those who secure one of the limited pasteboards for the humdinger hop," said the tanked scholar as he vaulted his seventeenth hydrant.

The increase in the net profits of the Canadian Pacific Railway for the first eight months of the year ending August 31st is \$6,814,895.76, according to a financial statement issued at the headquarters of the Canadian Pacific

MAJOR STEELE JOINS MCGILL SIGNAL STAFF

(Continued from page one.)

munication Engineering at McGill. It is perhaps not generally known that the signal branch of the Canadian Militia is responsible for all communication, not only official but commercial in the north of Canada. Signal Officers are stationed from the mouth of the Mackenzie and Dawson to the main centres of the Northwest, and there has been a tremendous saving in time since the wireless was put into operation. In this regard the statement continues to state:

"The question of communication in the Arctic regions assumes a greater importance, when we remember the maintenance of our Dominion over far distant islands depends on our being able to exercise control, and it is only the unremitting work of the Department of National Defence establishing and maintaining wireless stations for the use of the Royal Canadian Mounted Police and the administrative offices of the Government which has made the control possible. Since the establishment of the new department of Communication Engineering at McGill was first mooted, the authorities at Ottawa have given all the co-operation and assistance in their power and their aid has been of very great value."

Major Steele is a graduate of Toronto University. He served throughout the war in the department of signalling. This department rendered very great services throughout the war.

The Ancient and Honorable Artillery Company of Boston, one of the oldest military organizations in the United States, being founded as an offshoot of the famous Artillery Company of London, in 1630, held their 289th annual field day and march past at Montreal, arriving at the Canadian Place Viger Station on October 2nd. About 250 members of this organization, representing the oldest families in the State of Massachusetts, took part in this event.

at Montreal. This is the increase in profits as compared with the profits for the same period in 1925. The increase in the gross earnings over the same period. In 1925 is stated at \$12,691,364.57.

Notices

Notices must be legibly written on one side of the paper only and must be in the McGill Daily office before eight o'clock on the night previous to publication. Brevity is essential. Under no circumstances will notices be accepted over the telephone.

TRACK PRACTICE

Interfaculty Track Meet, Friday Oct. 15th. Practice daily from 3 to 6 p.m. at the Stadium. Everybody welcome.

NOTICE

The scheduled hours for swimming in the Knights of Columbus Tank, 254 Mountain St. (four blocks west of Peel) below St. Catherine St. Mon., Wed. and Fridays, 5.30—6.45 p.m. Tuesday, 2.30—6.30 p.m. Thursday, 5.30—6.30 p.m.

NOTICE

Friday 15, will be a holiday for the university sports.

J. A. NICHOLSON, Registrar.

CHESS CLUB

First meeting of the Chess Club will be held in the Union tomorrow, Oct. 13, at 5 o'clock.

MAX GARMAISE President

OLD SCOUTS' CLUB

The Old Scouts' Club will meet today, Oct. 12th, in the Strathcona Hall. Supper will be served at 6.15. All those wishing to attend, telephone P. Matthews, Up 0290, or W. Whitehead, Wal. 1720.

MISSION GROUP OF S.C.A. AND S.V.M.

The initial meeting of this group will be held in the S.C.A. Room of Strathcona Hall at 5 p.m. on Thursday next, Oct. 14th. Please note the day.

AMERICANS ATTENTION

There will be a meeting of all Americans in the Music Room of the Union, today, Oct. 12th, at 5 p.m. All are requested to be present to organize a program for the coming year.

BLAZERS

Blazers loaned by Jackman's Ltd., for the Varsity game are returnable immediately.

MCGILL RADIO ASSOCIATION

Meeting will be held in Room 37 Engineering Building on Oct. 14th at 6 p.m. All interested are invited to attend.

SCARLET KEY

There will be an important meeting of the Scarlet Key Society at the Union, 8 p.m. today. All members urged to attend.

NOTICE

Will the following who are taking subscriptions for the McGill Fortnightly Review come to the Union

ally examined this term or they will be debarred from practices Dr. Harvey will be at R.V.C. today from 3.30—5.

R.V.C. '30

There will be a class meeting in the Moyse Hall at 1 p.m. today.

R.V.C. SPORTS

There will be a general practice of all events behind the R.V.C. today from 1.30—2.00. Will the event managers please be on hand to coach. A list of the managers has been posted on the Athletic Notice board and all those who wish their attendance recorded should report to their managers before leaving the practice.

N. McMARTIN Sports Manager

WOMEN GRADUATES

Will all women students in the Graduate School meet in the Common Room of the Royal Victoria College today at one o'clock.

LOST AND FOUND

LOST

A small, light brown, pocket book. Finder please leave at Union Tuck Shop or with Harry at Engineering Building.

LOST

On Friday night at the Alumnæ

IMPERIAL TODAY AND ALL WEEK Six First-Class Acts

ALSO "The Two-Gun Man" Featuring FRED THOMSON and the marvel horse "SILVER KING"

Dinner at R.V.C. A black fountain pen, finder please return to porter at R.V.C.

LOST

Glasses, glasses case, and silver pencil in or around Physics Bldg. Finder please leave with Janitor of Physics Bldg.

LOST

Black and gold Swan fountain pen lost Thursday afternoon on college grounds. Finder please return to Miss Gibson, School of Graduate Nurses.

LOST

Loose leaf leather bound note book containing Zoology and Chemistry notes. Finder please return to Bill Gentleman.

LOST

A diamond-shaped fraternity pin in Biological Bldg. Finder please leave at 829 University street or call Plat. 1681. Reward.

LOST

McGill Handbook, bearing the name of S. O. Weiss. If found, please return to Tuck Shop.

FOUND

A loose leaf note book in Hogg's (Photographers), St. Catherine St. on Saturday, Oct. 9th. Owner, presume-

ably a mining student, apply to Janitor of Engineering Bldg.

FOUND

In office of principal's secretary loose leaf book with notes on a biology.

FOUND

A ladies purse in the Arts Building. Apply to the Porter.

FOUND

Watch-chain in Strathcona Hall, owner apply to Mr. Fletcher in Union.

FOUND

In Chemistry Building, loose leaf note book, English note. Apply to the Janitor the Chemistry Building.

LOST

One brown suede men's glove. In Arts Building. Please return to Janitor's office.
